

Specifically for the Fulfilment Companies

Patented

▶ Principle

This is a re-usable cardboard pallet, recommended for safe shipping of medium-sized loads or even containers and POP boxes.

▶ Technical features

Kay Pal® is a complete range of very light, 100% recyclable pallets, ideal for fulfilment companies. The pallet comprises three adjustable parts:

- ▶ A double or triple wall top.
- ▶ Two or three feet, depending on the model.
- ▶ Between 4 and 18 cores per pallet. The pallet as a whole is recognised as being highly rigid and resistant. Made of cardboard, Kay Pal® is fully recyclable. It is also the ideal solution for POP because any brand mark can be printed on it.

▶ A standard range

KAY PAL®	600 x 400		800 x 600		1200 x 800 TC-4	1200 x 1000 TC-4
	SP-2	Super-2	SP-2	Super-2		
Number of feet	4	4	6	6	15	15
Number of entries	2	2	2	2	4	4
Gross weight (in kg)	0,630	0,730	1,300	1,460	3,230	3,890
Theoretical static compression resistance (in DAN)	2400	2400	3600	3600	9000	9000
Recommended load* (in kg)	100	150	150	200	400/500	400/500

* The estimated load depends on how it is spread across the pallet.

▶ Kay Pal®:

- A re-usable cardboard pallet.
- Several years' experience of the industry in Europe.
- Very useful for picking, but also for POP boxes.

The information contained in this document is indicative and not binding. The Producer reserves the right to change the product and related technical features. The information, provided in good faith, does not imply any guarantee on our part for specific conditions use.

▶ Economic or commercial advantages

Kay Pal® is light, which makes it much easier to handle. Clean and hygienic, it is highly recommended for shipping of food products. Safety levels are good, with no splinters or nails.

Economical for transporting heavy loads (air or sea freight). When used in conjunction with a container, it means that a single-material product is possible.

▶ References

Numerous retailers already use the system in France (Raja, Siremballage, etc.), Germany, Benelux and Scandinavia. It is also used by automotive manufacturers such as Toyota and Ford.
