

Specifically for the Fulfilment Companies

▶ Principle

Kay Pal® Klip is a DS Smith Kaysersberg model which enables a shipping container or POP retail distribution box to be fixed to a cardboard pallet. This is a simple, suitable response to your shipping and point-of-purchase display needs. Assembly and loading are very easy, thanks, among other things, to the optional bottom sheet.

▶ Technical features

Kay Pal® Klip can be used with Kay Pal® Standard 8/6, 12/8, 12/10 or tailor-made pallets and a cardboard container with variable composition and dimensions. One sure advantage is that it provides complete, single-material packaging. It is simply a case of inserting the Kay Pal® Standard pallet in the bottom of the case and securing it. Kay Pal® Klip can be used for shipping up to 250 kg in 12/8 format or standard 8/6 and 12/8 POP cases.

► Kay Pal® Klip :

- a shipping container or POP tray clipped on to a cardboard pallet
- Easy to assemble
- Light and resistant
- 100 % recyclable

The information contained in this document is indicative and not binding. The Producer reserves the right to change the product and related technical features. The information, provided in good faith, does not imply any guarantee on our part for specific conditions use.

► Economic or commercial advantages

Since it is automatically fastened, without the need for nails or staples to fix it to the pallet, Kay Pal® Klip is quick and easy to assemble and safe to use. Furthermore, it is an original system which saves a lot of time. The container's weight and surface area are reduced through the use of short flaps on the bottom. It is an economical solution for parcel distribution and air freight. Recycling is no problem, since both parts are 100% recyclable.

► References

Kay Pal® Klip is very popular in the automotive sector for the shipping of spare components. Toyota, Ford and many other manufacturers and retailers already use the Kay Pal® Klip for their shipments in France and Europe.
